

# Rooftop Solar Quality Protocol

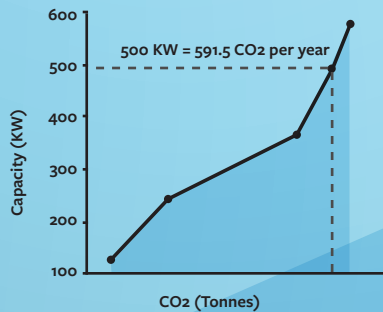

Hero Future Energies presents industry know-how on project engineering

- **Cables are:-**
- **FRLS (Fire Retardant Low Smoke)**
- UV Protected
- Tested for extreme weather conditions
- Best insulation with **XLPE / XLPO**

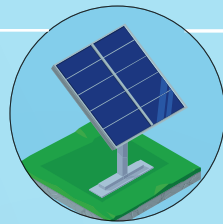

## The Real Carbon Offset

- Capital cost of GC plant: Best in the industry
- Accelerated Depreciation: As applicable

**Our System Design** offers customized solutions for you

Made for **25 years:** Safe and reliable

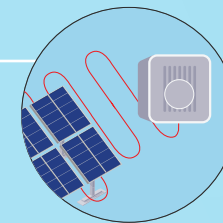

We use Indian as well as International **SPV modules** of Tier I manufacturers

Highest efficiency modules **(> 16.5%)**

We use best in class string solar inverters with multiple **MPPT (Maximum Power Point Tracking)** thus ensuring optimum generation leading to optimum returns

Maximum inverter efficiency to be **> 98%**

**O&M services** monitor plants functionality

We take care of your plant through a dedicated and professional team
